

## Kiři Alğı Ölçeđinin Öğretmen Adayları İçin Güvenirlik ve Geçerlik çalıřması

Dr. Mustafa BULUŐ

### Abstract

in this study, the concept of attributional complexity was explained and the Person Perception Questionnaire which can be used to asses that construct, was adapted to Turkish. The results showed a high level of internal reliability consistency ( $\alpha = .78$ ,  $p < .001$ ); test-retest reliability ( $r = .96$ ,  $p < .001$ ), discriminant ( $r = -.20$ ,  $p > .05$ ) and convergent ( $r = .57$ ,  $p < .001$ ) validity. in the study, the concept of attributional complexity was discussed with a social cognitive perspective.

**Key Words:** Attributional Complexity, Schema, Student Teachers
